Game Description

Five Card Linked Progressive is an optional bonus wager that can be played on a variety of poker-variants. The outcome of the *Five Card Linked Progressive* is not dependent on the base game's outcome.

Based on the chosen configuration, the *Five Card Linked Progressive* can be evaluated using a five-card hand that is either made up of cards dealt within the base game or by dealing additional community cards to form the full five-card hand. If configured using community cards, they should be dealt face down as to not provide additional information that can affect any base game wager decisions. The following shows the cards used to form the full five-card hand used in the *Five Card Linked Progressive* evaluation, based on the chosen configuration:
