SideplayR Rules of Play for Keno Bonus Board in Live Keno

The player must purchase the underlying Keno game to be eligible to purchase the optional Keno Bonus Board.

a) The Keno Bonus Board is a separate additional purchase and is evaluated independently from the underlying Keno ticket prize schedule. The purchased Keno Bonus Board is tied to the sold Keno ticket.
b) A unique randomized 80-position Keno board is generated for each eligible play. Board symbol locations are randomized while the certified symbol counts remain fixed.
c) The underlying Keno game draws 20 numbers from the 80-position Keno field. Only the first four (4) called numbers are used for the initial evaluation in Keno Bonus Board outcomes.
d) Order does not matter for the first four (4) called numbers.
e) The Keno Bonus Board positions that correspond with the first four (4) called numbers must all correspond to the same paying symbol group to win that group.
f) If the first four (4) called numbers all correspond to the Pot of Gold board positions, the 5th called number is evaluated for the Pot of Gold at the End of the Rainbow Progressive Event.
g) If the 5th called number corresponds to a Rainbow position, the player wins the Pot of Gold at the End of the Rainbow Progressive Award. If the 5th called number does not correspond to a Rainbow position, the player wins the Fixed Pot of Gold.
h) Fixed prizes are not split.
i) Progressive wins are split equally among all progressive winners in the same draw, subject to the minimum progressive rule award.
