

OVERVIEW

Mini Ultimate Texas Hold'em is a table game played with a standard 52-card deck that is shuffled at the start of each game. The player begins by placing equal Ante and Blind wagers. Optionally, they may also place a Flush Plus side wager and/or a 3 Card Bonus side wager.

MAIN BET

After all bets have been placed, each wagering player is dealt one card, face-down. The dealer receives one card, face-down. Three community cards are dealt face-down to the table. After reviewing their card, the player must either place a Play wager of three times (3×) the Ante, or else check. Two community cards are then turned and shown face-up (the Flop). If the player has not made a Play wager, then they must either place a Play wager of two times (2×) the Ante, or else check. The last community is then turned and shown face-up (the River). If the player still has not made a Play wager, then they must now either place a Play wager of one times (1×) the Ante, or else fold and forfeit their Ante and Blind wagers. Note that any optional wagers remain active regardless of whether the player plays or folds. All cards are then revealed. The player makes their best three-card Poker hand from their one initial card and any two of the three community cards. The dealer does likewise. All wagers are then resolved. If the dealer has at least a Queen high, then the dealer is said to "qualify". If the dealer qualifies and the player beats the dealer, then the Ante wager wins and pays 1 to 1. If the dealer does not qualify, or if the player ties the dealer, then the Ante wager pushes. Otherwise, the Ante wager loses. Regardless of whether the dealer qualifies, if the player beats the dealer, the Play wager will win and pay 1 to 1, and the Blind wager will win or push according to the paytable. If the player ties the dealer, the Play and Blind pushes. Otherwise, the Play and Blind wager both lose.

The hand rankings from highest to lowest are:

- Mini royal flush
- Straight flush
- Three of a kind
- Straight
- Flush
- Pair
- High card

Ties are broken in standard three-card poker fashion by comparing, in order, the ranks of any three-of-a-kinds, pairs, and single cards within the hand. The one exception is that when comparing straights, A-2-3 is considered lowest straight.

FLUSH PLUS SIDE BET

The Flush Plus Side Bet is based on the player's best three-card Poker hand from their one initial card and any two of the three community cards. The wager wins and pays according to the paytable if the player can form a Flush or better; otherwise, the wager loses.

3 CARD BONUS SIDE BET

The 3 Card Bonus Side Bet is based on the three-card Poker hand formed by the three community cards. If the hand forms a Pair or better, the wager wins and pays according to the paytable; otherwise, the wager loses.

MGL Progressive

Multi Game Link Progressive is an optional progressive wager configured with Big Raise Stud, Caribbean Stud Poker, Four Card Poker, Crazy 4 Poker, Let it Ride, Mississippi Stud, Texas Hold 'em Bonus, Ultimate Texas Hold 'em, DJ Wild Stud Poker, Flushes Gone Wild, Three Card Poker, Three Card Sabotage, 235 Stud Poker, Run 'Em Twice Poker, Double Hook Poker, Three Card Poker Temptation, Mini Ultimate Texas Hold'em, and Bourre Noir. *Multi Game Link Progressive* uses a standard 52-card deck and requires a minimum of $1.00 to be bet. After the player places the mandatory main game wager, the player may then place the optional *Multi Game Link Progressive* wager. After all wagers are placed, the dealer then follows house procedures for dealing the underlying game theme. Should the player elect to fold their base game hand, the folded hand still qualifies for payouts on the progressive wager. *Multi Game Link Progressive* can be played with up to a maximum of 7 players.

The *Multi Game Link Progressive* is resolved using the player's 5-card hand. The player is paid based on the outcome of the 5-card hand as detailed in the MGL Paytable document.

To evaluate the player hands, the five cards used for the *Multi Game Link Progressive* are obtained in the following way for each underlying game theme:

Mini Ultimate Texas Hold'em – Progressive hand is formed from the player's hole card, the three community cards, and the dealer's hole card.

The seed values and increment rates for all progressives can be found in Table 3 through Table 5. All seed values are for a $1.00 wager. Progressive reset values must scale linearly with the wager size to maintain the House Edge (HE). Two configurations are available. One uses fixed seed values for the progressives, while the other uses configurable reset values for some or all of the progressives. Reset values of $0 will be used for the configurable seed amounts.

The Minor Progressive will always have a fixed seed value for paytable PMG-ML-03.

Hand	PMG-01	PMG-02
Royal Flush	100% of Progressive	100% of Progressive
Straight Flush	10% of Progressive	10% of Progressive
Four of a Kind	300 for 1	300 for 1
Full House	50 for 1	50 for 1
Flush	40 for 1	40 for 1
Straight	30 for 1	30 for 1
Three of a Kind	9 for 1	9 for 1

Hand	PMG-ML-01	PMG-ML-03
Royal Flush	100% of Major Progressive	100% of Mega Progressive
Straight Flush	100% of Minor Progressive	100% of Major Progressive
Four of a Kind	300 for 1	100% of Minor Progressive
Full House	50 for 1	50 for 1
Flush	40 for 1	40 for 1
Straight	30 for 1	30 for 1
Three of a Kind	9 for 1	9 for 1

Table 3. Single Level Progressive Settings – Fixed Seed

Paytable	Seed Value	Increment Rate
PMG-01	$10,000	21%
PMG-02	$2,000	22%

Table 4. Single Level Progressive Settings – Configurable Seed

Paytable	Seed Value	Increment Rate
PMG-02	$0	22%

Table 5. Multi-Level Progressive Settings – Fixed Seeds

	PMG-ML-01		PMG-ML-03	
Level	Seed Value	Increment Rate	Seed Value	Increment Rate
Mega Progressive	N/A	N/A	$10,000	10%
Major Progressive	$10,000	11%	$1,000	8%
Minor Progressive	$1,000	10%	$250	3%

The progressive pays are paid from the corresponding progressive meter, whereas the other awards are paid from the tray. When a player has a progressive winner, the dealer then awards the appropriate progressive win to the appropriate player that won and adjusts the meter appropriately for the prize won. House procedures are then followed for paying the prize.

Special care is taken to reconcile multiple progressive meter wins. In the event more than one progressive hand, payable from the progressive meter, hits at the same table during the same round, the dealer will first pay the player farthest on their right and then the dealer moves counter-clockwise to pay the other players that qualify. Note that per the supplier documentation, as regulatory procedures permit, this policy can be replaced by casino internal controls. When a player receives a Royal Flush or Straight Flush, all other players who placed the progressive side bet are paid an Envy win, which is paid against the paytable listed in Table 6.

Table 6. Envy Pays

Hand	PMG-01	PMG-02	PMG-ML-01	PMG-ML-03
Royal Flush	$1,000	$1,000	$1,000	$1,000
Straight Flush	$300	$300	$300	$300

The player who has either the Royal Flush or Straight Flush is not eligible for the Envy pay on their own hand and receives the normal prize pay only. However, that player is eligible for Envy pays triggered by another player's qualifying hand during the same round. It is possible for a player to receive multiple Envy pays during a single hand. It is not required for the player who has the qualifying hand triggering the Envy pay to have participated in the progressive wager. Eligible players will still receive the Envy pay on that hand. Envy pays are paid to eligible players at the table where the qualifying hand occurred only, and not the other linked tables. The Envy pays listed are for a $1.00 wager and scale proportionally with the wager.
